c. MARITIME BOUNDARIES

TERRITORIAL SEA/CONTINENTAL SHELF BOUNDARY: AUSTRALIA AND PAPUA NEW GUINEA-INDONESIA

B. ANALYSIS. The following comments are extracted from Limits in the Seas, No. 87, "Territorial Sea and Continental Shelf Boundaries: Australia and Papua New Guinea-Indonesia," August 20, 1979:

As a consequence of a series of three agreements, the Governments of Australia and Papua New Guinea, on the one hand, and Indonesia, on the other, have delimited territorial sea and continental shelf boundaries between the respective states. The agreements create, north of the island of New Guinea, a single-segment boundary extending northward from the shore for a distance of approximately 27 miles. The boundary terminates in water depths approaching 1500 fathoms (2,743 meters). In the south, the boundary extends along the western reaches of the Torres Strait and the Arafura Sea and stops near the limits of the former Portuguese territory of Timor. After the Timor gap, an area currently undelimited, the maritime boundary resumes and is delimited southwestward through the Timor Sea.

...

On December 18, 1978, Papua New Guinea and Australia signed a treaty at Sydney concerning sovereignty and maritime boundaries in the area between the two countries, including the area known as Torres Strait, and related matters.

...

The boundary between Indonesia and Papua New Guinea, in the Pacific Ocean north of the Island of New Guinea, extends nearly due north from the coastal terminus of the land boundary to a point approximately 27 miles seaward. Because both states claim 12-mile territorial sea breadths, the single-segment boundary serves as both a territorial sea and, in part, a continental shelf boundary. The geologic shelf north of the island, however, is very narrow; and within a few miles of the shoreline, water depths in excess of 6,000 feet (1,829 meters) are encountered. As a result, the terminus of the shelf boundary is approximately 9,000 feet (2,743 meters) of water, well beyond existing limits of exploitability.

In the south, the maritime boundaries pass through the Arafura Sea in the east and the Timor Sea in the west. The Arafura Sea extends approximately from the limit of the Torres Strait westward to the island of Timor.

...

[T]he boundary between Indonesia and Papua New Guinea in the north consists of a line connecting two points, C1 - situated at 2°8'30"S. and 141°E., and C2 - situated at 2°8'30"S. and 141°1'30"E. C1 marks the terminus of the land boundary. C2, situated 27.14 miles seaward, is approximately equidistant from the main cape north of Djajapura and an unnamed cape on the New Guinea coastline. Between points C1 AND C2, the boundary is not equidistant from the respective national baselines.

In the south, the Indonesia-Papua New Guinea maritime boundary extends from point B3 through B2, B1, A1, A2, and terminates at A3. These turning points have the following coordinates:

Point	Coordinates	Dist. btwn. Points (miles)
B3	09°08'08"S, 141°01'10"E	land terminus 17.45
B2	09°23'00"S, 140°52'00"E	2.89
B1	09°24'30"S, 140°49'30"E	34.13
A1	09°52'00"S, 140°29'00"E	53.06
A2	10°24'00"S, 139°36'00"E	42.32
A3	10°50'00"S, 139°12'00"E	
	Total	149.85

Thus, the Indonesia-Papua New Guinea territorial sea and continental shelf boundaries total 176.99 miles: 149.85 in the south and 27.14 in the north.

...

The Australian sector of the Indonesian maritime boundary begins at the trijunction point A3 and extends through intermediate points to A16. The area divided by this part of the boundary has water depths of 200 meters or less.

Westward of A12 to A16, the boundary leaves the Ceram shelf and its location relates primarily to the geomorphologic provinces underlying the Arafua Sea.
